Professional Experience

Senior Consultant – Akkodis

Remote | 2026 – Today

- .Net development
- SQL Server and SSIS projects
- AWS

Desarrollador de Software – Grupo Reacciona

Las Rozas, España | 2025 – 2026

- Migrate legacy code from ASP.Net to Python
- DJango, pandas
- AWS

Software Developer – Re-Inventa
Madrid, Spain | 2018 – 2025

- Developed web applications using Node.js, JavaScript, Knockout, Express, and MySQL.

- Built custom automation tools with .NET, Python, and Node.js.

- Developed and maintained REST APIs and managed deployments using Azure.

- Maintained legacy systems using Altitude Script Language (ASL).

- **BPO Integration & Reporting:** Over four years collaborating with BPO partners to display client data on-screen, store call outcomes, and generate charts and reports illustrating key performance metrics.

- **Voice Automation:** Designed and implemented bots for both outbound and inbound phone calls.

- **Softphone Connectivity:** Configured basic softphone integrations with BPO software to manage and route calls seamlessly.

- **Client Engagement & International Rollouts:** Led requirements workshops and client meetings; traveled abroad to implement solutions on-site, ensuring a smooth transition and maintaining client confidence throughout the change process.

Web Developer – Tictum Innovation and Technology
Madrid, Spain | 2016 – 2017

- Participated in the development of a Java-based asynchronous video interview platform.

- Used Spring and Hibernate for backend development and JavaScript for frontend.

- Completed 40-hour internship followed by 7-month employment.
